## AUTHOR BIOGRAPHY

*The Language of Science and Faith: Straight Answers to Genuine Questions*  
**Available March 2011**

\$20, 224 pages, hardcover  
978-0-8308-3829-5

[www.karlgiberson.com](http://www.karlgiberson.com)

**Karl W. Giberson** (Ph.D.) is a leading voice in America's creation-evolution controversy and the author or coauthor of four books on science and religion, including *Oracles of Science: Celebrity Scientists Versus God and Religion* (with Mariano Artigas), *Species of Origins: America's Search for a Creation Story* (with Donald Yerxa) and *Saving Darwin: How to Be a Christian and Believe in Evolution*, which was included in the *Washington Post's* "Best Books of 2008" list.

Giberson serves as professor of physics at Eastern Nazarene College, directs the Forum on Faith and Science at Gordon College, and is executive vice president of The BioLogos Foundation, which he helped launch.

He has published more than 150 articles, reviews and essays, and he blogs regularly at *The Huffington Post*.

**Francis S. Collins** (M.D., Ph.D.) is a world-renowned physician-geneticist known for his discovery of the causes of many human genetic diseases. He is also known for spearheading the Human Genome Project, which produced the first complete sequence of human DNA in 2003.

In 2006 Collins published *The Language of God: A Scientist Presents Evidence for Belief*, which spent twenty weeks on the *New York Times* bestseller list. In 2007, he founded The BioLogos Foundation to respond to the many queries he receives about science and faith. Since August 2009, he has served as the director of the National Institutes of Health.

His most recent books, all authored prior to his current government position, include *The Language of Life: DNA and the Revolution in Personalized Medicine* and *Belief: Readings on the Reason for Faith*.

## BREAKING NEWS: Science and Religion Are Not at War

In *The Language of Science and Faith: Straight Answers to Genuine Questions*, world-renowned scientist Francis Collins, author of *The Language of God*, and fellow scientist Karl Giberson explain that faith does not mean rejecting science. Together they break down this misunderstanding by answering dozens of common questions people ask about evolution, Darwin, the age of the earth, the existence of God and more.

Why do so many people think science and religion are at war?

What is the difference between young earth creationism (YEC), old earth creationism (OEC) and intelligent design?

What is BioLogos and how does it challenge the linkage between evolution and atheism?

What are some common misunderstandings about evolution?

What is the best proof that evolution has occurred?

Did we really come from monkeys?

How can we know the universe is billions of years old when nobody was there to record this information?

Do we have to let science tell us how to interpret the Bible?

Do science and religion have to overlap?

What role could God have in evolution?

Doesn't evolution make the problem of evil much worse?

How does evolution help faith?
